

## Rigi10™ Malleable Penile Prosthesis with HydroShield™ Coating

### Product Overview

#### Physician Benefits

##### ♂ Easy to implant

High bending angle may allow implantation with a smaller incision. The increased lubricity with **hydrophilic coating** may promote easier surgical placement.

##### ♂ Easy to size

Available in six diameters to better meet the patient's anatomical needs.

##### ♂ Easy to assemble

SecureFit™ Extenders connect easily to add length. All diameters come with two each of the extender size (0.5 cm and 1.0 cm).

##### ♂ Easy to maximize infection prevention

The hydrophilic coating offers implanters the freedom to choose their preferred antibiotic dipping solution<sup>1</sup>.

#### Patient Benefits

##### ♂ Rigid shaft and distal end for a strong erection.

##### ♂ High bending angle and memory for easy and comfortable concealment.

##### ♂ Durable. Rigi10™ continues to offer satisfactory performance results even after long cycles of simulated tests.<sup>1</sup>

#### Flexible Rod Technology™

Flexible Rod Technology™ provides easy bending and avoids undesirable turning on the axis of the implant when an erection is desired by the patient.

Flexible Rod Technology™ enables the rod to reach a bending angle of more than 135 degrees while simulating a more natural erection feeling.

## SecureFit™ Extenders

Each Rigi10™ malleable penile prosthesis comes with a set of SecureFit™ Extenders, available in 0.5 cm and the 1.0 cm sizes.

SecureFit™ Extenders are easily attached to the Flexible Rod. The firm connection provides the physician with confidence in a secure connection between the extenders and the Flexible Rod.

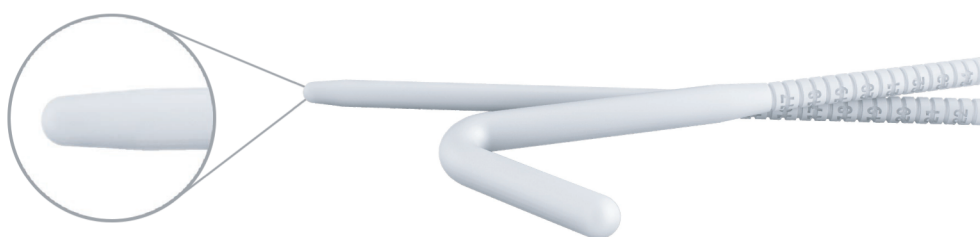

## Hydrophilic Coating with HydroShield™

Rigi10™ incorporates a hydrophilic coating on all external component surfaces. The HydroShield™ coating offers implanters the freedom to choose the antibiotic dipping solution. HydroShield™ facilitates the rapid and strong absorption of the solution on the device and may promote easier device implantation.

## Offers 5 different diameters

Diverse diameter options with Rigi10™ ensure best fit for the anatomical needs of each patient. Rigi10™ 9 mm and 10 mm rods are designed with conical distal tips to facilitate implantation in patients with narrower or compromised corpora cavernosa.

## Ordering Information

| Prosthesis Product | Prosthesis Diameters | Prosthesis Lengths | Extenders             |
|--------------------|----------------------|--------------------|-----------------------|
| RG1009             | 9 mm                 | 23 cm              | 0.5 cm<br>and<br>1 cm |
| RG1010             | 10 mm                | 23 cm              |                       |
| RG1011             | 11 mm                | 25 cm              |                       |
| RG1012             | 12 mm                | 25 cm              |                       |
| RG1013             | 13 mm                | 25 cm              |                       |
| RG1014             | 14 mm                | 25 cm              |                       |

Caution: Federal Law (U.S.) restricts this device to sale by or on the order of a physician.

Prior to use, please review the Instructions for Use for a complete listing of indications, contraindications, warnings, precautions and potential adverse events.
